

Dr. L. Scott Eaton serves as a Professor in the Department of Geology and Environmental Science at James Madison University. He earned his Doctorate Degree from the Department of Environmental Sciences at the University of Virginia, and received his Masters Degree in Geology from Southern Illinois University, and a Bachelors degree in Geology from James Madison University. Scott began his teaching career as an Instructor of Geology in 1991, and has taught courses in Hydrogeology, Environmental Soil Science, Earth Surface Processes, Physical Geology, Engineering Geology, Natural Hazards, and Field Techniques. His research interests include: 1) examining the frequency of landslides and catastrophic storms in the central Appalachians; 2) sediment transport in river systems, and 3) the role of geology in controlling the availability of groundwater resources. Scott also works as a geological consultant, primarily involved with locating high yielding water wells using fracture trace analysis in conjunction with other geologic methods of investigation. He is married to Dr. Christine May, a professor of Biology at James Madison University. They have two sons, Benjamin and Elijah, who happily enjoy being outside and getting dirty as much as their parents do.
